

Dj Information Systems Inc
GLOBAL CHANGES ALWAYS START SMALL

CAPABILITY STATEMENT

Microsoft modernization, software development, and systems integration

David P. Jones Sr., President | (854) 832-1333
David.Jones@djinfosys.com | djinfosys.com

Modernizing government workflows with practical, maintainable technology.

DJ Information Systems, Inc. (DIS) delivers custom software, Microsoft Power Platform, Microsoft 365, data integration, and application modernization solutions for government and public-sector organizations. Led by a technology professional with more than 12 years of relevant delivery experience, DIS helps agencies and prime contractors modernize workflows, integrate systems, and transition solutions into maintainable operations.

POWER PLATFORM | .NET / C# | SHAREPOINT / M365 | SQL SERVER | REST APIs | DATA + WORKFLOW AUTOMATION

CORE COMPETENCIES

Microsoft Power Platform & M365

Power Apps, Power Automate, Dataverse, SharePoint Online, Microsoft 365, digital forms, approvals, notifications, collaboration, and dashboards.

Custom Software & Modernization

C#, .NET, ASP.NET, ASP.NET Core/MVC, secure web applications, internal tools, legacy modernization, troubleshooting, and performance optimization.

Data, APIs & Systems Integration

SQL Server, REST APIs, SFTP, third-party systems, data migration and cleanup, payment/status integration, reporting, and dashboards.

DELIVERY SUPPORT BUILT IN: Requirements clarification | UAT | administrator and support documentation | access planning | training | operational handoff

REPRESENTATIVE DELIVERY EXPERIENCE

EXPERIENCE + ATTRIBUTION	RELEVANT SCOPE + EVIDENCE
Centers for Disease Control and Prevention (CDC) — Federal Health Applications Modernization DIS CORPORATE EXPERIENCE SECOND-TIER SUBCONTRACTOR 1 SENIOR APPLICATION DEVELOPER AUG. 2022–MAY 2026	Provided approximately 45 months of continuous senior application development support across CDC systems using C#/ .NET, ASP.NET, Power Apps, Power Automate, Dataverse, REST APIs, SQL Server, SFTP, and Power BI. Automated a 100,000+ record URL-rewrite process, reducing processing time from more than 13 hours to under 10 minutes while generating comparison reports, SQL update scripts, and rollback scripts. Refactored 130+ stored procedures and automated ingestion and Power BI reporting for more than one million vendor contact-center records.
South Carolina Department of Education — Enterprise Systems PRINCIPAL EXPERIENCE — PRIOR IT STAFF-AUGMENTATION ENGAGEMENT LONG-TERM CONTRACTOR SEPT. 2013–JAN. 2026	Led development of GAPS, a statewide grant-management platform supporting 75+ programs, approximately 300 users, and programs serving approximately 800,000 students while administering billions of dollars in grant funding over its operating life. Replaced spreadsheet- and mainframe-based processes with electronic budgeting, award-limit validation, role-based security, payment/status integrations, and real-time reporting. Prevented budgets from exceeding authorized awards and reduced administrative approval cycles from several months to a few hours.
South Carolina Department of Environmental Services — Workflow Modernization PRINCIPAL EXPERIENCE — MARCH 2026 - PRESENT IT STAFF-AUGMENTATION ENGAGEMENT	Modernized SharePoint-based workflows using Power Apps and Dataverse, refining business logic with stakeholders. Improved Power Automate error handling and routing, reducing approval times from weeks to one or two days. Configured Power Platform deployment pipelines from development through test/UAT to production, supporting application lifecycle management (ALM), change control, and consistent solution deployment.

DIFFERENTIATORS + PRIME CONTRACTOR SUPPORT

Modernize before replacing. Extends and improves existing .NET, SQL Server, SharePoint, Power Apps, and Microsoft 365 environments when targeted modernization is the practical path.

Integrated Microsoft delivery. Connects applications, automation, collaboration, and data within the Microsoft ecosystem while supporting testing, documentation, and operational transition.

Maintainability built in. Produces administrator guidance, access plans, training materials, support notes, and handoff procedures.

PRIME CONTRACTOR SUPPORT

HOW DIS STRENGTHENS A PRIME TEAM

DIS adds senior Microsoft delivery capacity for prime contractors supporting government modernization programs. DIS can augment an existing team or own a defined work package covering .NET and Power Platform development, systems integration, data processing, troubleshooting, UAT, documentation, training, and operational handoff. Prior second-tier federal delivery demonstrates DIS's ability to integrate into established contracting teams and support long-term performance.
