

Dj Information Systems Inc
GLOBAL CHANGES ALWAYS START SMALL

CAPABILITY STATEMENT

Technology modernization for business and public- sector teams.

DJ Information Systems, Inc. provides custom software, Microsoft 365, Power Platform, automation, integration, hosting, and infrastructure support for organizations that need practical systems built with clarity, documentation, and maintainability.

CORE COMPETENCIES

Services aligned to modernization, integration, and operational improvement.

Custom Software and APIs

.NET, C#, ASP.NET Core, backend services, secure portals, internal tools, and system integrations.

Power Platform Automation

Power Apps, Power Automate, Dataverse, approvals, notifications, intake, and workflow modernization.

Microsoft 365 and SharePoint

SharePoint modernization, document collaboration, Microsoft 365 planning, and role-aware team solutions.

Systems Integration

APIs, SQL Server, Dataverse, third-party systems, data movement, and reporting foundations.

Hosting and Infrastructure

Docker deployments, VPS planning, Nginx, Proxmox, server management, and deployment-aware support.

Documentation and Handoff

Requirements clarification, administrator handoff, support notes, and maintainable implementation guidance.

NAICS ALIGNMENT

Technology service classifications.

CODE	CLASSIFICATION	FIT
541511	Custom Computer Programming Services	Primary fit for custom apps, APIs, migrations, Power Apps, and software support.
541512	Computer Systems Design Services	Systems planning, Microsoft 365, SharePoint, Power Platform, and integration design.
541519	Other Computer Related Services	IT support, automation, troubleshooting, configuration, and related technical services.
541513	Computer Facilities Management Services	Applicable when a scope includes infrastructure, servers, systems, or IT operations.
541611	Management Consulting Services	Applicable for workflow improvement, requirements, process planning, and documentation.
611420	Computer Training	Applicable for Power Apps, SharePoint, Microsoft 365, end-user, or admin training.

DIFFERENTIATORS

- Practical full-stack delivery across software, data, Microsoft cloud, automation, and infrastructure.
- Comfortable translating business workflow problems into technical implementation plans.
- Focused on requirements clarity, maintainability, documentation, access planning, and operational handoff.
- Small-business responsiveness with public-sector and enterprise-adjacent delivery experience.

RELEVANT EXPERIENCE CONTEXT

- Federal health technology environments through subcontractor project support.
- State education technology delivery experience.
- State environmental services technology support context.
- Microsoft 365, Power Platform, custom software, data, and infrastructure-aware delivery.

Organization references are experience context only and do not imply endorsement.

BUYER FIT

- Government agencies and subcontracting partners.
- Small businesses and nonprofits modernizing manual workflows.
- Enterprise teams needing focused implementation support.
- Organizations needing practical hosting, deployment, or systems support.
